

EnCrypt PLUS

EnCrypt PLUS are the most commercially competitive EnCrypted Drives on the market.

Available in storage capacities from 2GB to 64GB Hypertec's **EnCrypt PLUS** Drive features 256 bit AES EnEncryption using Integral Hardware EnEncryption, enforcing password generation rules to ensure that user data is only accessible by password; attempting to gain entry to the **EnCrypt PLUS** Drive repeatedly with different passwords will destroy the Cryptokey, making data unrecoverable resulting in the generation of a new key. In Addition **EnCrypt PLUS**'s SafeErase function removes all traces of data to protect from illegal restoring.

Hot Plug and Play allows **EnCrypt PLUS** to be removed and inserted at any time, another key advantage is that **EnCrypt PLUS** does not require administrative rights to unlock the device.

Slimline
